

BrightView will start scalping and over seeding our Mutual 8 lawns on November 8. This is a very messy process with lots of dirt and dust flying around so please keep your windows closed when they are in your area. After they complete the scalping and over seeding they will then start trimming trees that are hanging over the tops of buildings and cleaning the gutters. Then they will be cleaning out all drain pipes. We will also have someone from BrightView at our Town Hall meeting to discuss the process of this work.
